DETAILED ACTION

Notice to Applicant(s)

1. This office action is responsive to the amendment filed on 9/10/03. Claims 1-3 are pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, are rejected under 35 U.S.C.103(a) as being unpatentable over Izawa (5,385,371) in view of Heuwieser et al. (4,668,858).

As per claim 1, Izawa discloses a method of enabling a user to plan a route using a computer system, including steps: printing a map of a geographic area, the map including a plurality of geographic locations and coded data indicative of an identity of the map of a plurality of references points of the map (see columns 1-2, lines 63-19), receiving in the computer system indicating data from a sensing device operated by the user, the indicating data regarding the identity of the map and a position of the sensing device relative to the map (see columns 2-3, lines 58-28; columns 4-5, lines 60-35; and column 5, lines 53-68), the sensing device, when placed in an operative position relative to the map, the sensing device sensing the coded data in the vicinity of a particular geographic location and generating the indicating data using at least some of the sensed coded data (see columns 3-4, lines 44-18), and identifying in the computer system and from the indicating data, at least one geographic location (see column 2, lines 20-38).

Art Unit: 3661

Izawa does not disclose planning the route. However, Heuwieser et al. disclose planning the route, in the computer system, using the at least one geographic location as at least one of the route starting point, a route way point, and the route destination (see columns 1-2, lines 26-54; and column 3, lines 14-54). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teach of Izawa by combining planning the route, in the computer system, using the at least one geographic location as at least one of the route starting point, a route way point, and the route destination to assist driver to determine a travel route to a destination.

As per claim 2, Izawa discloses printing a map covering at least part of the geographic area covered by the route (see column 4, lines 28-59).

Claim 3 is system claim corresponding to method claims 1-2 above. Therefore, it is rejected for the same rationales set forth as above.

Conclusion

4. Applicant's argument filed on 9/10/03 has been fully considered and they are deemed to be persuasive. However, upon updated search, the new ground of rejection has been set forth as above.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 703-308-8223. The examiner can normally be reached on M-F (7:30 AM-5:30 PM), off every other Friday.
